

Top 10 Unrivaled Features of Blue Coat Cloud Service

Blue Coat Cloud Service is a uniquely efficient and cost-effective way to protect the enterprise against today's advanced security threats. With no security appliances to install and maintain, a flexible subscription is all you need for a zero-footprint, no-compromise, cloud-based content security for your enterprise. As the leader in content security, Blue Coat is able to offer innovative features and capabilities unavailable in other cloud security services. Here are just a few of the many reasons why Blue Coat should be your cloud security service vendor of choice.

1 The Pioneer and Market Leader in Content Security

Blue Coat is the unquestioned leader in the content security market.

- #1 Secure Web market leader
- Over 200 patents issued and pending
- Positioned as a leader in the Gartner Magic Quadrant for Secure Web Gateway 9 years running

2 The Most Trusted Brand in Web Security

The largest enterprises in the world rely on Blue Coat to secure their business and employees.

- Over 70% of Fortune Global 500 rely on Blue Coat security solutions
- More than 15,000 customers worldwide
- Securing more than 75 Million users

3 The Most Comprehensive Advanced Threat Protection

Blue Coat Cloud Service leverages the industry's only Global Intelligence Network.

- Over four million previously unseen or uncategorized threats blocked per day
- Multiple Blue Coat and 3rd party file inspection technologies supported

- Optional integrated sandboxing with Advanced Malware Analysis Service

4 More Than 10 Years of Cloud Service Leadership and Expertise

Blue Coat has the longest heritage in cloud security services with the introduction of the Global Intelligence Network.

- First cloud datacenter operational in 2001
- Servicing more than 75 Million end-users
- Most extensive cloud datacenter experience in the industry

5 The Most Reliable Cloud Service

Telco-grade POPs are trusted by AT&T and other service providers.

- Fully meshed and fully redundant network
- 99.999% SLA
- 24/7 follow-the-sun global support with 6 support centers around the world

6 Every Service Everywhere

Blue Coat data centers are strategically positioned across the globe to offer uninterrupted service wherever you are.

- Data center coverage across 6 continents

- Every data center available to every subscriber
- Each data center equipped to provide all security services

7 The Most Secure Cloud Infrastructure

All Blue Coat data centers are designed with multiple layers of security to protect against physical and network attacks.

- ISO 27001 and SSAE 16 Certified
- Every datacenter location follows stringent personnel access control
- Strict enforcement of role-based access to sensitive customer data

8 The Only Cloud Service to Encrypt All Communication Between Users and Cloud

Encrypting all communications between users and our cloud data centers is the only method to ensure data privacy.

- Uses existing firewalls to secure all office communications to cloud via IPSec VPN
- Secures all device communications including laptops, smartphones and tablets
- Prevents eavesdropping when connected via an untrusted network

9 The Most Comprehensive and Integrated Mobile Security Solution

Blue Coat Cloud Service offers the most comprehensive support for securing mobile devices and apps.

- Support for Apple iPhone, iPad and Android devices
- MDM Profile integration with AirWatch MDM
- Secure use of all Apps (Standard Browser, Mobile Browser and Native Apps)

10 The Only True Hybrid Solution with Universal Policy and Reporting

With Cloud Service and Blue Coat ProxySG appliances powered by the Global Intelligence Network, Blue Coat offers the only true hybrid solution.

- Identical security analysis and enforcement for all deployments
- Consistent and unified reporting across all deployments
- Hosted Cloud and on-premises log archive of up to 50 billion logs for up to 3 years
