

Defend against cyber attacks like a relentless, intelligent machine

Symantec Endpoint Protection + Blue Coat Secure Web Gateway

Faster detection. Faster containment. Faster response.

Cyber criminals are working around the clock and around the globe looking for ways to:

Steal information

Disrupt business

Extort money

Maliciously interfere with daily life

430,000,000

new pieces of malware were released in 2015

That's more than **1,000,000 per day**. In 2016, there will be **EVEN MORE**.

Every network-connected endpoint is a launch pad for a cyber attack.

You told us your challenges...

Stop attacks discovered via the Secure Web Gateway from spreading to endpoint devices

Fewer point products from different vendors that aren't designed to work together

Quick learning of the newest threats

Accurately detect known and zero-day threats to block them ASAP

...Symantec and Blue Coat listened

Defending against threats is impossible without coordinated advanced network and endpoint security

INTRODUCING

Symantec Endpoint Protection

Protects against advanced threats with powerful, layered protection backed by industry leading security intelligence.

Blue Coat Secure Web Gateway

Authenticates, decrypts, and orchestrates inspection of web content for compliance and advanced threat protection.

Shares threat intelligence from network to endpoint, to provide the full spectrum of coverage for superior threat protection.

Symantec Endpoint Protection is a perfect complement to Blue Coat Secure Web Gateway

- Greater protection at the perimeter against unknown and zero-day threats
- Better detection and remediation from the endpoint to the network and through the cloud
- Shared global intelligence to correlate threats across the network, endpoint, and cloud
- Comprehensive policy enforcement, including blacklisting attacks, decrypting and feeding security controls, and tightening the overall security posture of the enterprise

Solution At-A-Glance

- Next generation, multi-layer endpoint protection
- Faster detection, faster containment, faster response at scale, all in a single agent
- Enabled by artificial intelligence and machine learning
- Easy remediation
- Powered by the largest and most diverse Global Intelligence Network!

Symantec Endpoint Protection + Blue Coat Secure Web Gateway work better together to protect against attacks across devices and geographies.
